Thanks for filling in this form: [Python4Physics - Summer 2026](#)

Here's what was received.

Python4Physics - Summer 2026

In the summer of 2026, the UC Berkeley Physics department will be hosting a *free coding class for High School students*, also casted live for anybody wishing to learn the basics of coding.

The class is designed to give students the key necessary tools to learn how to write simple code using a programming language called Python. In this class, students will learn some fun concepts in Physics, Math, statistics, and, of course, programming, by solving problems numerically.

Participants will also learn to solve equations, do data analysis, and model various systems, among other techniques.

The class will be hosted in person for a small number of local students. Those students will be able to come to the Berkeley campus and interact closely with the lecturers. The rest will be able to join remotely and interact with the lectures via Zoom Webinar.

Note: It is ***not necessary to have any Physics or Calculus background***, only some basic algebra.

If you are interested in **participating in person**, please fill out **all sections** of this **application form**.

If you are interested in participating **remotely**, fill out the form and you will be automatically invited to join remotely. Detailed information about the schedule will be sent starting early June 2026.

Key points:

- **What is Python4Physics?** Free programming class
- **Who can apply?** Everyone
- **Where?** Hybrid (some students will be in person in the UC Berkeley Campus, others will be remote)
- **When?** Start date: June 15 2026, end date: July 10, 2026

- **What defines who joins in person vs. hybrid?** Space limit on campus.
- **Deadline?** in-person applicants will only be considered until **May 23**. We will notify those accepted for in-person by June 1. We will be accepting **remote applicants until June 10**.
- **How often will the class meet?** Three days per week, for approximately 2 hours. 10am-12pm. Pacific time.
- **Will computers be provided for in-person participants?** We do not know yet.

This program is part of the REYES program - <https://physics.berkeley.edu/REYES>

For any questions, email reyes-stem@berkeley.edu with the Subject line "P4P Summer 2026 Question"

By registering via this form, you agree to receive information about P4P related activities.

The survey asks about STEM- H fields. These are Science, Technology, Engineering, Math (STEM) and Health science fields.

Your email address (namandixit07@gmail.com) was recorded when you submitted this form.

Participant/Student First Name *

Naman

Participant/Student Last Name *

Dixit

Please select your age: *

21

Participation

How will you be participating?

☐

In person from a local high school

☐

Remotely from inside the USA (including territories)

Remotely from outside the USA

Remotely from outside the USA Information

What country do you live in? *

India

If your country is not listed above, please write it here.

.....

Please indicate the city where you live: *

Jaipur

.....

What best describes you? Select all that apply. *

☐

High school counselor

☐

K-12 Educator

☐

Parent

☐

Middle school student

☐

High school student

☒

Undergraduate student

☐

Graduate student

☐

University alumni

☐

Faculty/researcher

☐

University staff

☒

Non-university researcher

☐ Other

More information about you

In this course, you will need access to a computer. With that in mind, do you have regular access to (check all that apply): *

- ☒ A computer
- ☒ Internet/WiFi
- ☒ Mobile Device
- ☒ None of the above

If you have a computer provided by your school, and you need to return this computer during the summer, please write the name of your school.

.....

If you are associated with an academic institution, please indicate that institution name below.

University of Rajasthan
.....

Is somebody in your family working and/or studying in a STEM field? *

- ☒ Yes
- ☐ No, I am first in my family

Check all your academic areas of interest *

- ☐ Astronomy/Astrophysics
- ☐ Biological Sciences
- ☐ Chemistry & Biochemistry

☐ Computer Science

☐ Engineering

☐ Mathematics

☐ STEM-H Education

☐ Physics

☐ Statistics

☐ Other STEM fields

☒ Other: Quantum Information Theory and Neuroscience

In order to understand our participants, please let us know how strongly you agree with the following statements.

STEM-H Education is a multi-disciplinary approach to teaching and learning that integrates science, technology, engineering, math, and health with the objective of strengthening problem-solving skills.

*

	Strongly disagree	Disagree	Neutral	Agree	Strongly agree
I am certain I can master STEM-H courses	☐	☐	☐	☒	☐
Even if STEM-H coursework is hard, I can learn it	☐	☐	☐	☐	☒
I am certain I can figure out how to do the most difficult STEM-H coursework	☐	☐	☐	☒	☐
I expect to do very well in courses required for a STEM-H degree	☐	☐	☐	☐	☒
Compared to other students, I expect to do much better in STEM-H courses	☐	☐	☐	☒	☐
I expect to successfully complete a STEM-H major	☐	☐	☐	☐	☒

In a brief paragraph, please explain why you think this class may be beneficial for you. *

To effectively analyze complex systems, I rely on Python as my primary engine for simulation and modeling. My focus involves the computational execution of Lindblad equations and the visualization of Bloch sphere trajectories; consequently, this program is vital for developing the sophisticated analytical frameworks my research demands.

Is there anything else you would like us to know about you?

I am an incoming participant in the NSF IAIFI PhD Summer School and am currently enrolled in the Experience Student Track of Stanford University's Code in Place program. My academic journey includes being recognized as a Harvard Aspire Leader and participating in the CERN Solvay Programme.

I have further honed my expertise through workshops at MIT CSAIL, Max Planck Institute, and ETH Zurich. My work and profile have also been formally appreciated by the Vice President of the Oxford AI Society.

REYES hosts general-audience talks as well. If you are interested in joining other REYES activities outside of Python4Physics, indicate below that you want to be added to the email list: *

All REYES activities will be announced via REYES-STEM@berkeley.edu. Please be on the look out for these emails, since they will require further actions from you.

☐ No, thanks.

☒ Yes, please!

THANK YOU FOR FILLING OUT THE APPLICATION FOR SUMMER 2026!
